<sup>1</sup> Reasons for Exam: Off-Feed (OF), Calving Problem (CP), Twins (TW), Retained Placenta (RP), Slack Udder / Low Milk (LM), Diarrhea (DIAR), Re-Check (RE), Fever (FV)

<sup>2</sup> Abnormal Rumen - weak or no contractions, can't feel rumen (too empty), and/or gas between rumen and body wall.

<sup>3</sup> Abnormal Nasal Discharge - colored discharge (white, yellow, or red), very thick or large amount of nasal discharge.

<sup>4</sup> Possible Test Results: Ketone test (milk or urine) if abnormal rumen, off-feed, no other diagnosis; ping for DA if off-feed, abnormal rumen, no other diagnosis; CMT if abnormal udder; Milk culture if temp + abnormal udder; Fecal culture if fever + diarrhea (Enteritis).

<sup>5</sup> Possible Diagnoses: Milk Fever (MF) if down + no temp + no injury around calving, Metritis (MET) if temp + foul-smelling vaginal discharge after calving; Displaced Abomasum (DA) if ping (+), Mastitis (MAST) if temp + abnormal udder; Ketosis (KET) if ketosis test (+), Pneumonia (PNEU) if temp + abnormal nasal discharge + cough (at least 2 of these 3); or Enteritis (ENT) if temp + diarrhea.
