The Histologic Basis of Ocular Disease

Thursday June 12, 2008
to
Sunday, June 15, 2008

University of Wisconsin
School of Veterinary Medicine
Madison, Wisconsin, USA

ABOUT THE COURSE

Ten places are being reserved in the Pathology section of the Magrane Basic Science Course in Veterinary and Comparative Ophthalmology sponsored by the American College of Veterinary Ophthalmologists for interested pathologists or pathology residents. This month long course is offered to ophthalmology residents every two years. The Pathology section, the Histologic Basis of Ocular Disease, is given as a four day segment of the course and offers broad exposure to ophthalmic pathology through didactics, group discussions, and gross and microscopic laboratory sessions.

COURSE INSTRUCTORS

Dick Dubielzig, DVM, DACVP, DACVO
University of Wisconsin
School of Veterinary Medicine

Brian Wilcock, DVM, Ph.D., DACVP, DACVO
Ontario Veterinary College
Ontario, Canada

Bruce Grahn, DVM, DABVP, DACVO
Western College of Veterinary Medicine
University of Saskatchewan
Saskatoon, Saskatchewan, Canada

EJ Ehrhart, DVM, DACVP
College of Veterinary Medicine & Biomedical Sciences
Colorado State University

Robert Peiffer, DVM, Ph.D., DACVO
Merck & Co., West Point, PA
School of Medicine, University of Pennsylvania

Paige Carmichael, DVM, Ph.D., DACVP
College of Veterinary Medicine
University of Georgia Athens

Gia Klauss, DVM, DACVO
College of Veterinary Medicine
University of Minnesota
COURSE SCHEDULE

Thursday June 12th
1:00 p.m. - 5:00 p.m.
- Introduction - Dr. Dick Dubielzig
- Cytokines and protein expression in eye disease
- Congenital and developmental eye disease
- Pathology of spontaneous and iatrogenic trauma

Friday June 13th
8:00 a.m. - 5:00 p.m.
- Pathology of the cornea, conjunctiva, and orbit
- Laboratory: Congenital Disease and Trauma
- Uveitis
- Glaucoma

Saturday June 14th
8:00 a.m. - 6:00 p.m.
- Laboratory: Uveitis and glaucoma
- Pathology of the lens
- Pathology of the retina (the Stuart Young Memorial Lecture)
- Pathology of the optic nerve
- Neoplasia
  Ocular Neoplasia in Dogs
  Ocular Neoplasia in Cats

Sunday June 15th
8 to Exhaustion
- Laboratory: Retina, optic nerve, and neoplasia

GENERAL INFORMATION

The Basic Science Course in Veterinary and Comparative Ophthalmology will be held at the University of Wisconsin School of Veterinary Medicine, from June 2 - 20, 2008. The course will provide the participant with intensive instruction in ophthalmic anatomy, embryology, immunology, physiology, pharmacology, microbiology, histopathology, and diagnostic and examination techniques. The course is intended to provide a foundation of scientific knowledge in these areas for clinical and research applications in veterinary and comparative ophthalmology. Lecture and laboratory sessions, developed by an international faculty with expertise in these areas, will be given.

The Histologic Basis of Ocular Disease Short Course will be held in conjunction with the Basic Science Course (June 12 - 15, 2008). It is a team-taught course in the histopathology of congenital, dystrophic, degenerative, and infectious and neoplastic disease affecting the animal eye. Individual instruction is emphasized. Participants in the Basic Science Course will attend this session, and additionally, this session is open to veterinary pathology residents and veterinary pathologists with an interest in ocular pathology.
