AMBULATORY
Rotation Emphasis: Bovine medicine, surgery and theriogenology (individual and herd approaches)

Recommended: Required rotation

Best time to take: As soon as prerequisite rotations are finished; advantage to have it before boards

Intern candidates: No special advantage

Clinic Schedule: Dictated by practitioner scheduling; 10 days with certified practice

Outpatient/Inpatient: Almost exclusively on-farm work

Weekend Duty: None
What should you expect to do: Be an active participant - exams, procedures, diagnosis and treatments

Organization of receiving: Determined by the practitioner and practice schedule

Service Specific Clinic Work Expectations: treatment protocols, daily case log, business management exercise, summary statistics and rotation evaluation

On-Call Schedule/ICU: Available for emergency calls each night of the rotation

Study Expectations: Self-directed learning to enhance level of participation
