NEUROLOGY
NEUROLOGY (1)

- **Rotation Emphasis:**
  - Small animal neurology/neurosurgery
- **Recommended:** Class notes review
- **Best time to take:** Anytime, better after SA Int. Med. rotation
- **Intern candidates:** Fall
- **Clinic Schedule:** M-F (6)7AM to 6(7)PM, depends on # of inpatients. Latest 7:30 a.m.
  - Receiving: New appointments Monday, Wednesday; sometimes Tuesday; Rechecks most days
  - Surgery: Tuesday, Thursday, Friday
  - Emergency surgery: M, T, W, F daytime
- **Outpatient/Inpatient:** Mixed
- **Weekend Duty:** Only for hospitalized cases
NEUROLOGY (2)

- **Organization of receiving:**
  - Students see cases together as a group. One student is in charge, taking history and doing NE; the other students help with PE. Cases are discussed as a group. Depends on number of students on rotation.

- **Service Specific Clinic Work Expectations:**
  - Team work!
  - Examine inpatient every morning
  - Hands on, do many neurologic examinations! Own your case!
  - Assist in surgery for own case
What should you expect to do:

- History taking, physical and neurological examinations
- Formulating a differential diagnoses list, selecting appropriate diagnostic tests, deciding the most effective therapeutic plan for both medical and surgical neurology cases.
- Record keeping, discharge instructions, surgery reports, client communications
- Primary responsibility for inpatients together with residents and clinicians
Neurology (4)

- **On-Call Schedule/ICU:**
  - Participate in Small Animal On Call and ICU schedule

- **Study Expectations:**
  - Rounds 9-9:30 most mornings
  - Some rounds during the day
  - Active participation in rounds
  - Presentation of a short talk 10-15 min. on a specific neurological disease or neurological syndrome.
